Critical Bugs Report of Buggy Cars Ratings

1. "Buggy Rating" button is not navigating to the expected page (home page) and not giving appropriate message.

Bug Description:

When user navigate to "Popular Make" Page, the "Buggy Rating" button is not navigating to the home page and gives the message on the left bottom corner that the link is broken.
Similarly, when user navigate the "Overall Rating" page and navigate to any "Make" in the page, "Buggy Rating" button is not responding and displays broken message on the left bottom corner.
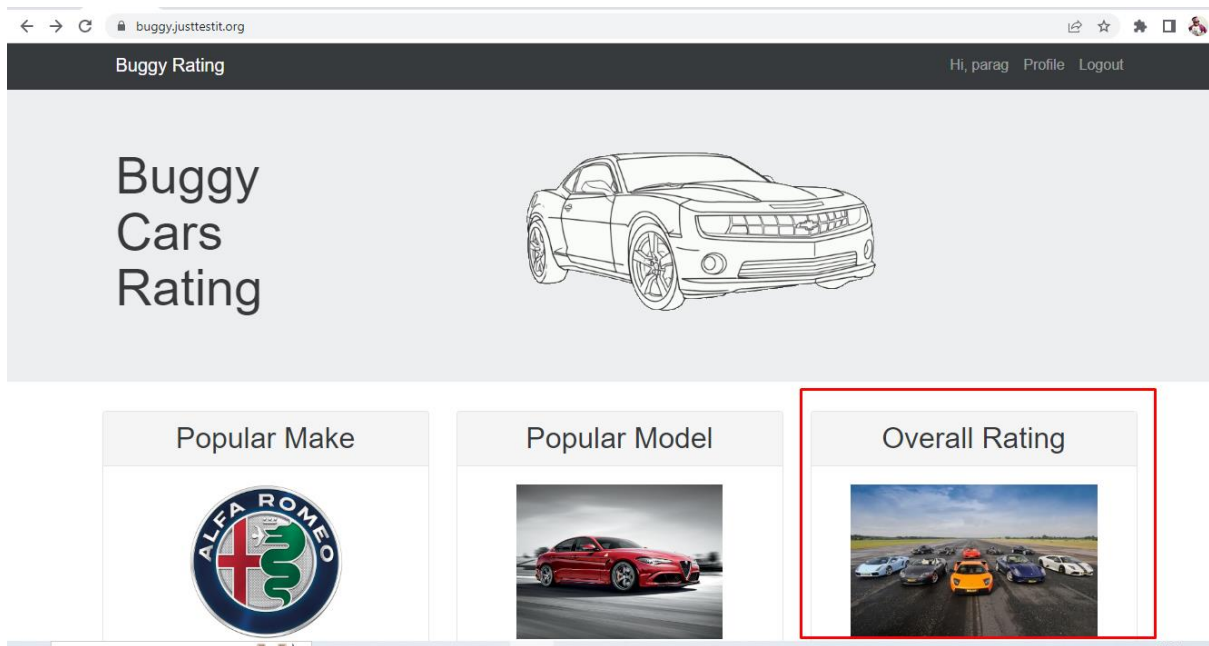

How to reproduce the Bug:
1. Register user and login into the "Buggy cars rating" page.
2. Go to the "Popular Make" page.
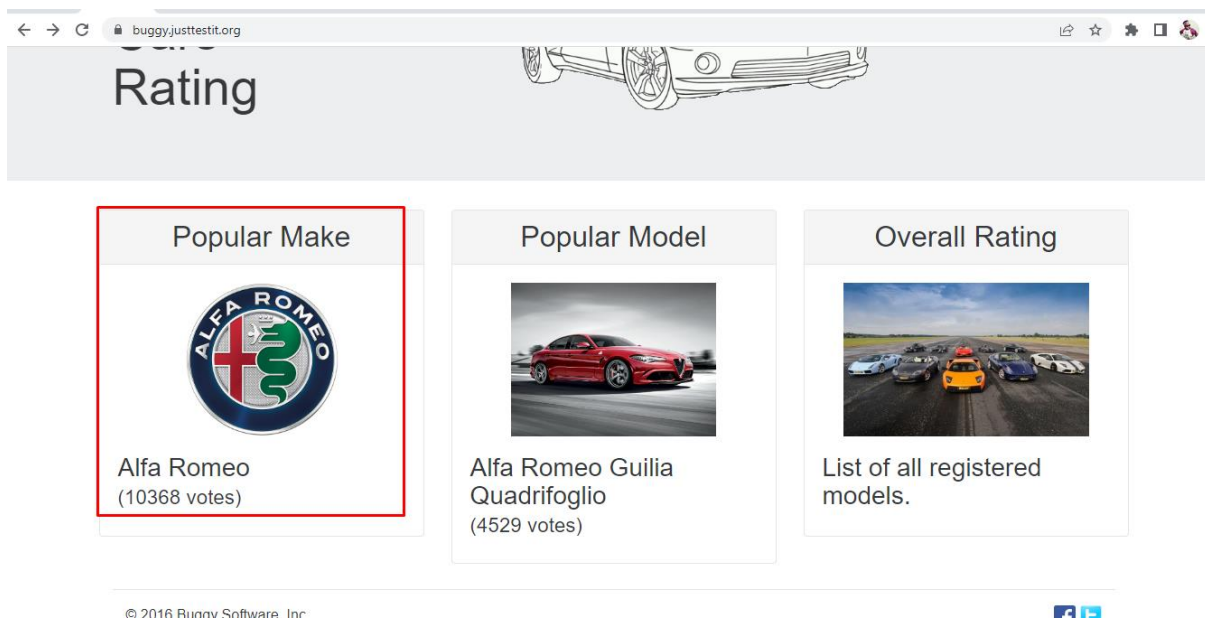

3. Click the "Buggy Rating" test on the top left corner.
4. Then again go back to the home page by clicking reverse arrow in the browser.

5. Go to the "Overall Rating" page.

6. Click the "Buggy Rating" test on the top left corner.

Expected Result:
When user click the "Buggy Rating" test on the top left corner, application should navigate to home page.

Actual Result:
When user click the "Buggy Rating" test on the top left corner, application is not navigating to the home page and on the left bottom corner link broken message displayed.

2. Authors are not visible for some of the cars (4c Spider, Giulia Quadrifoglio, Mito etc).

Bug Description:
Author is not visible or fetched in some cars like 4c spider, Giulia, Mito, Quadrifoglio etc.

How to reproduce the Bug:
1. Go to the "overall rating" page.
2. Look for 4c spider, Giulia, Mito, Quadrifoglio and click on the model.
3. Navigate to the Voting page and vote the model.

Expected result:
Date, Author, and Comment column should update in the table.

Inside the cockpit, luxuries are few but the sophisticated MOTEC M182 electronic control unit governs data, display and gearchanges while the Bosch Motorsport ABS offers 12 different traction settings that the driver can select via a control on the steering wheel. Adjustable anti-roll bars and dampers will enable drivers to set up the LP 620-2 Super Trofeo to their precise requirements, whatever the circuit or conditions.

3. Overall rating page, page number are not showing properly.

Bug Description:

In this scenario, Page should not exceed from total page 5 but user can go up to 6,7… and no data present on that page.

How to reproduce the Bug:

1. Go to "overall rating" page.
2. Go to the page number on the right bottom corner.
3. Traverse through the page number till 6,7 and more.

Expected Result:

After the 5th page, the next button should disappear.

Actual Result:

User can traverse more than 5 page and not data present. The wording is not correct.
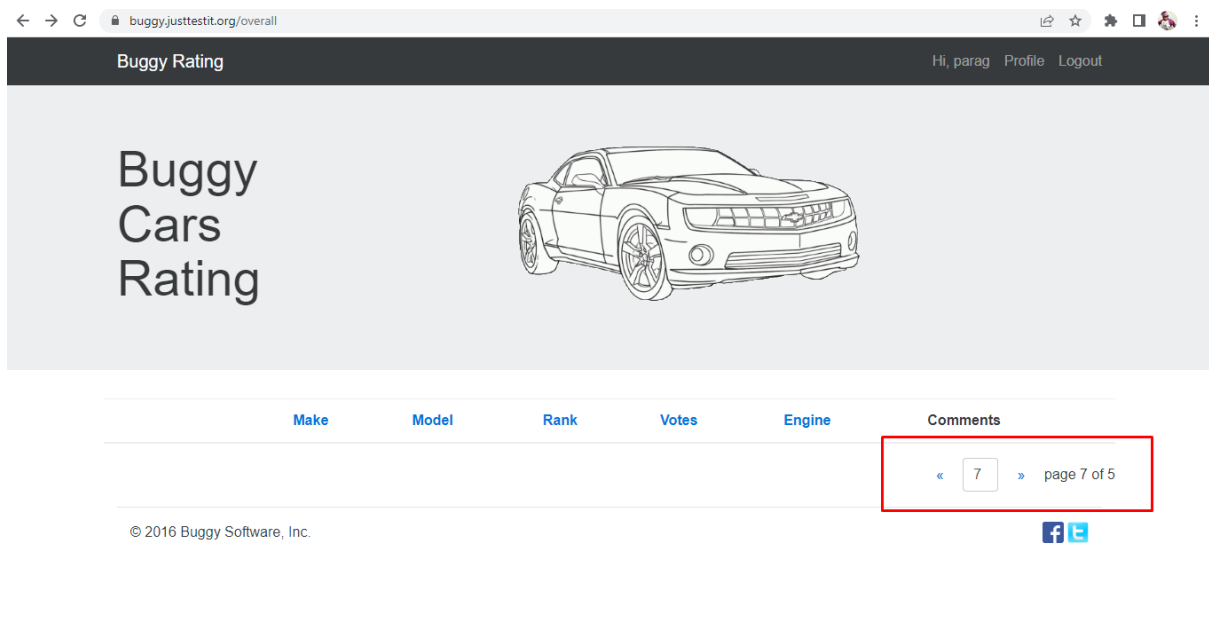

4. The Information of the Author is not updated when user vote without comment.

Bug Description:
The Author information is not updated when user vote without adding comment only vote count updated.

How to reproduce the Bug:
1. Go to "Overall Rating" page.
2. Look for the "AVENTADOR" and click on model.
3. Add vote without adding comment.
4. Observe author information is updated or not.

Expected Result:

Application should update the information of the Author without adding comment.

Actual Result:

Application not updating the information of the Author without adding comment. It only updating the vote count.

5. **When user want to go back in the previous page or home page it is not navigating properly for "Stratos" car link and No image and vote count and table displayed.**
   Similarly, the "Profile" button is not clicking for the same page.

Bug Description:

When clicking on "Stratos" car link in the Overall rating, there is no image and information about car, author, comment, Vote Count and also when I want to go back in the previous page by clicking reverse arrow of the browser or home page it is not navigating properly.

Similarly, the "Profile" button is not navigating by clicking for the same page.

How to reproduce the Bug:

1. Go to the "Overall rating" page.
2. Look for "Stratos" car in the 4th page and click on model.
3. Observe there is no vote count, comment, no image of car.
4. Click on the reverse arrow of the browser.
5. Click on the Profile button.

Expected Result:

"Stratos" Car image should be displayed, Author table, and Vote count should be seen. Also when click on the reverse arrow of the browser, it should navigates to the previous page.

**Actual Result:**

"Stratos" Car image not displayed, author table, Vote count not displayed and when user click on reverse arrow of the browser it is not navigating to the previous page.
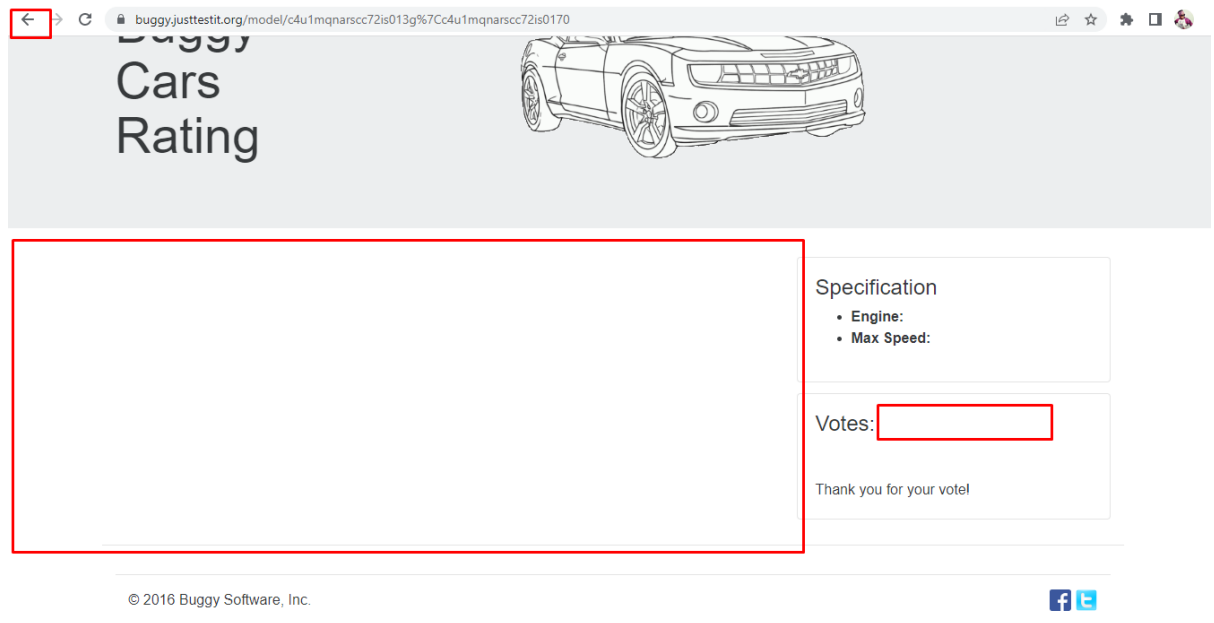

Other Observations:

- On 4th page of the "Overall Rating", "Ypsilon" Model thumbnail image is broken and also image inside the Ypsilon is broken. Can be given high severity.

«   4   »   page 4 of 5

- When traverse through the pages, if user click on reverse arrow in the browser, It should navigate to the previous page instead of the first page in "Overall Rating" page.
  Steps:
  1. Go to the website of "https://www.justtestit.org"
  2. Navigate to the "Overall Rating" page.
  3. Navigate to the pages from bottom right corner clicking ">>" and navigate to 4th page.
  4. Now click to the reverse arrow in the bowser.
  5. It will navigates to the 1st pageof the "Overall Rating".
